

OAB Drugs on the Formularies and how they are Approved

How Drugs are Approved for Sale and Listed for Reimbursement on Canadian Provincial Drug Benefits Programs (Formularies).

A drug manufacturer must submit its new drug product to the federal government's Health Products and Food Branch (HPFB) at Health Canada, for review and approval. The HPFB is responsible for approving a drug for sale and marketing anywhere in Canada. The HPFB evaluates a product's safety and efficacy and once it approves the product for sale in Canada, a Notice of Compliance (NOC) and a Drug Identification Number (DIN) for the product is issued.

After Health Canada issues an NOC, to be considered for funding under most governments' drug plans, a manufacturer must file a submission to the national Common Drug Review (CDR) process. The CDR is a single process for undertaking reviews and providing common listing recommendations for new drugs based on rigorous clinical and pharmacoeconomic reviews. This process applies to all federal, provincial and territorial (F/P/T) drug benefit plans in Canada.

All jurisdictions are participating except Québec, which has The Public Prescription Drug Insurance Plan, administered by the Régie de l'assurance maladie du Québec.

The TCCF is pleased to be able to provide the following listings of drugs and their manufacturers currently approved and covered under federal, provincial and territorial (F/P/T) drug benefit plans in Canada.

For further information on which drugs are and are not covered under the formularies, please contact the foundation.

Disclaimer: The formulary tables are a reference guide only and should not be considered a definitive list, since submissions, drug approvals and recommendations for inclusion and coverage under provincial Formulary/ Comparative Drug Indexes occur on a regular basis, we would suggest that you consult your provincial listings from time to time.
